## **August 11, 2018: Daily Update on the Parchment Water Response**

KALAMAZOO, MI— The Kalamazoo County Health & Community Services Department will provide a news release each day at 4:00 p.m. for the community with the latest information, and report on the daily activities surrounding the Parchment Water Response.

### **City of Kalamazoo, Public Services**

City of Kalamazoo Department of Public Services continues with the construction of the Park at Orient water station. Pending satisfactory new construction sampling results the pressure reducing station on G Ave, Sta.42 will be started up and commissioned late today and into Sunday. G Ave is currently open to traffic and will remain so until further notice. Additional site restoration and street restoration will take place at a later date to meet property owner and Road Commission of Kalamazoo County standards. All stations (three total) will be connected to new electrical services to be provided by Consumers Energy at future dates. This will not affect the stations operations or the current construction timeline.

A boil water advisory for five (5) households is in effect for City of Kalamazoo residents as construction continues to connect residents on the City of Parchment water supply system to the City of Kalamazoo's water supply system. This is a standard operating procedure for all infrastructure construction projects. Those residents impacted were notified by the City of Kalamazoo and will be in effect for 72 hours. As construction progresses, additional residents will be notified, as is standard for infrastructure construction. Below is the boil water advisory released today to the five (5) households:

**BOIL WATER ADVISORY**  
**New Water Infrastructure Installation**  
**Park Avenue**

The City of Kalamazoo is in the process of installing new water infrastructure near the intersection of Park Avenue and S. Orient Street, City of Kalamazoo. The work will result in a temporary loss of pressure starting approximately 9:00 a.m. Friday, August 10. Consequently, a precautionary boil water advisory is being issued in cooperation with the Kalamazoo County Health and Community Services Department for all water intended for drinking or ingestion or any consumptive uses within the affected area, including:

Park Avenue – From S. Orient Street (western boundary) to Virginia Avenue (eastern boundary), both sides of street;

Glendale Blvd. – Southeast corner of Glendale Blvd. and S. Orient Street

This advisory is precautionary only; there have not been any confirmed tests showing bacteria present in the water main at the location of the infrastructure repair. Initial sampling results will be available within 24 hours of its collection and the final set within 48 hours. It is expected that the advisory will be lifted within 72 hours (August 13).

Municipal water customers in the affected area may use bottled water for consumptive purposes or boil their tap water for 2 minutes prior to use for drinking or other ingestion. No special precautionary measures are necessary for water used for personal hygiene.

**Michigan Department of Environmental Quality (DEQ)**

*Testing: Private Residential Water Wells*

Since Saturday, July 28, the DEQ has worked in the community to test private residential drinking water wells. To date, they have collected samples from 106 residential wells and 1 irrigation well. For those not at home, a door hanger was left explaining DEQ's desire to obtain samples from their private water supply. For those residents where a hanger was left, the DEQ is requesting to please get in touch with them right away at 1-800-662-9278, so they can sample your private water well.

Residents with their own private water wells are being notified as results are received with the levels found in their wells and public health recommendations. The next steps after you receive your results will be dependent on the results. The Kalamazoo County Health & Community Services Department will work directly with you to explain the results and your next steps. Residents are advised to continue to use bottled water until they discuss their private well results with the Kalamazoo County Health & Community Services Department staff.

*Testing: City of Parchment Water Supply & City of Kalamazoo Water*

The DEQ collected five (5) samples each day, Monday, July 30-Thursday, August 2, of the City of Kalamazoo water at different locations within the City of Parchment water supply system. The DEQ will continue collecting five (5) samples each day this week starting on Monday, August 6 through Thursday, August 9. The DEQ is checking to ensure the City of Kalamazoo water is below the EPA's lifetime health advisory level of 70 ppt when it is in the City of Parchment's water supply system. Results are anticipated to be received next week.

**Water Distribution**

Weekend hours will remain Saturday 10:00 a.m. to 2:00 p.m. and Sunday 10:00 a.m. to 4:00 p.m. Hours include water delivery services. Residents are asked to verify their address when they pick-up their water supply. Please be advised that during instances of severe weather the Water Distribution Center at Parchment High School may experience shut-down hours.

On-site recycling at Parchment High School is available for residents to return used water bottles.

On 8/10/18, 1017 cases of water were distributed.

**Parchment Water Hotline (269-373-5346)**

The Parchment Water Hotline has transitioned to weekday hours only from 8:00 a.m. to 5:00 p.m..
