Kalamazoo County Data Hub Now Available Online as a Community Resource

KALAMAZOO, MI— The Kalamazoo County Health & Community Services Department is excited to announce the launch of the Kalamazoo County Data Hub, an online resource with Kalamazoo County specific data and statistics. Starting October 22, the Kalamazoo County Data Hub is available for everyone in the community to explore the data that reflects the health occurrences and outcomes in Kalamazoo County.

The purpose of the Data Hub is twofold: to disseminate important health data to the community and to act as a reliable resource for outside agencies to find data that supports their work. The Data Hub is a collection of data indicators from numerous sources that paint a picture of the health and well-being of Kalamazoo County residents. Local, state and national data resources and indicators are included on the website. The website features interactive data and highlights special reports pertaining to Kalamazoo County. The website also features a data request form that can be submitted to receive specific data. The Kalamazoo County Data Hub website can be accessed at www.kalcounty.com/hcs/datahub/.

“The Data Hub is an important resource for the community, partners and stakeholders alike. It brings together all of the data that reflects the health and well-being of Kalamazoo County,” says Mary Franks, Epidemiologist at Kalamazoo County Health & Community Services Department. “This vision for this project started over a year ago, and HCS is thrilled to have it officially launched and accessible to the community.”

The Data Hub will be continuously updated as newer data becomes available. The Data Hub will also add more health data and special reports as they become available. This resource will continually evolve to display the data that represents the status of Kalamazoo County’s health and wellness.
